SMART EXPENSE TRACKER

PRESENTATION

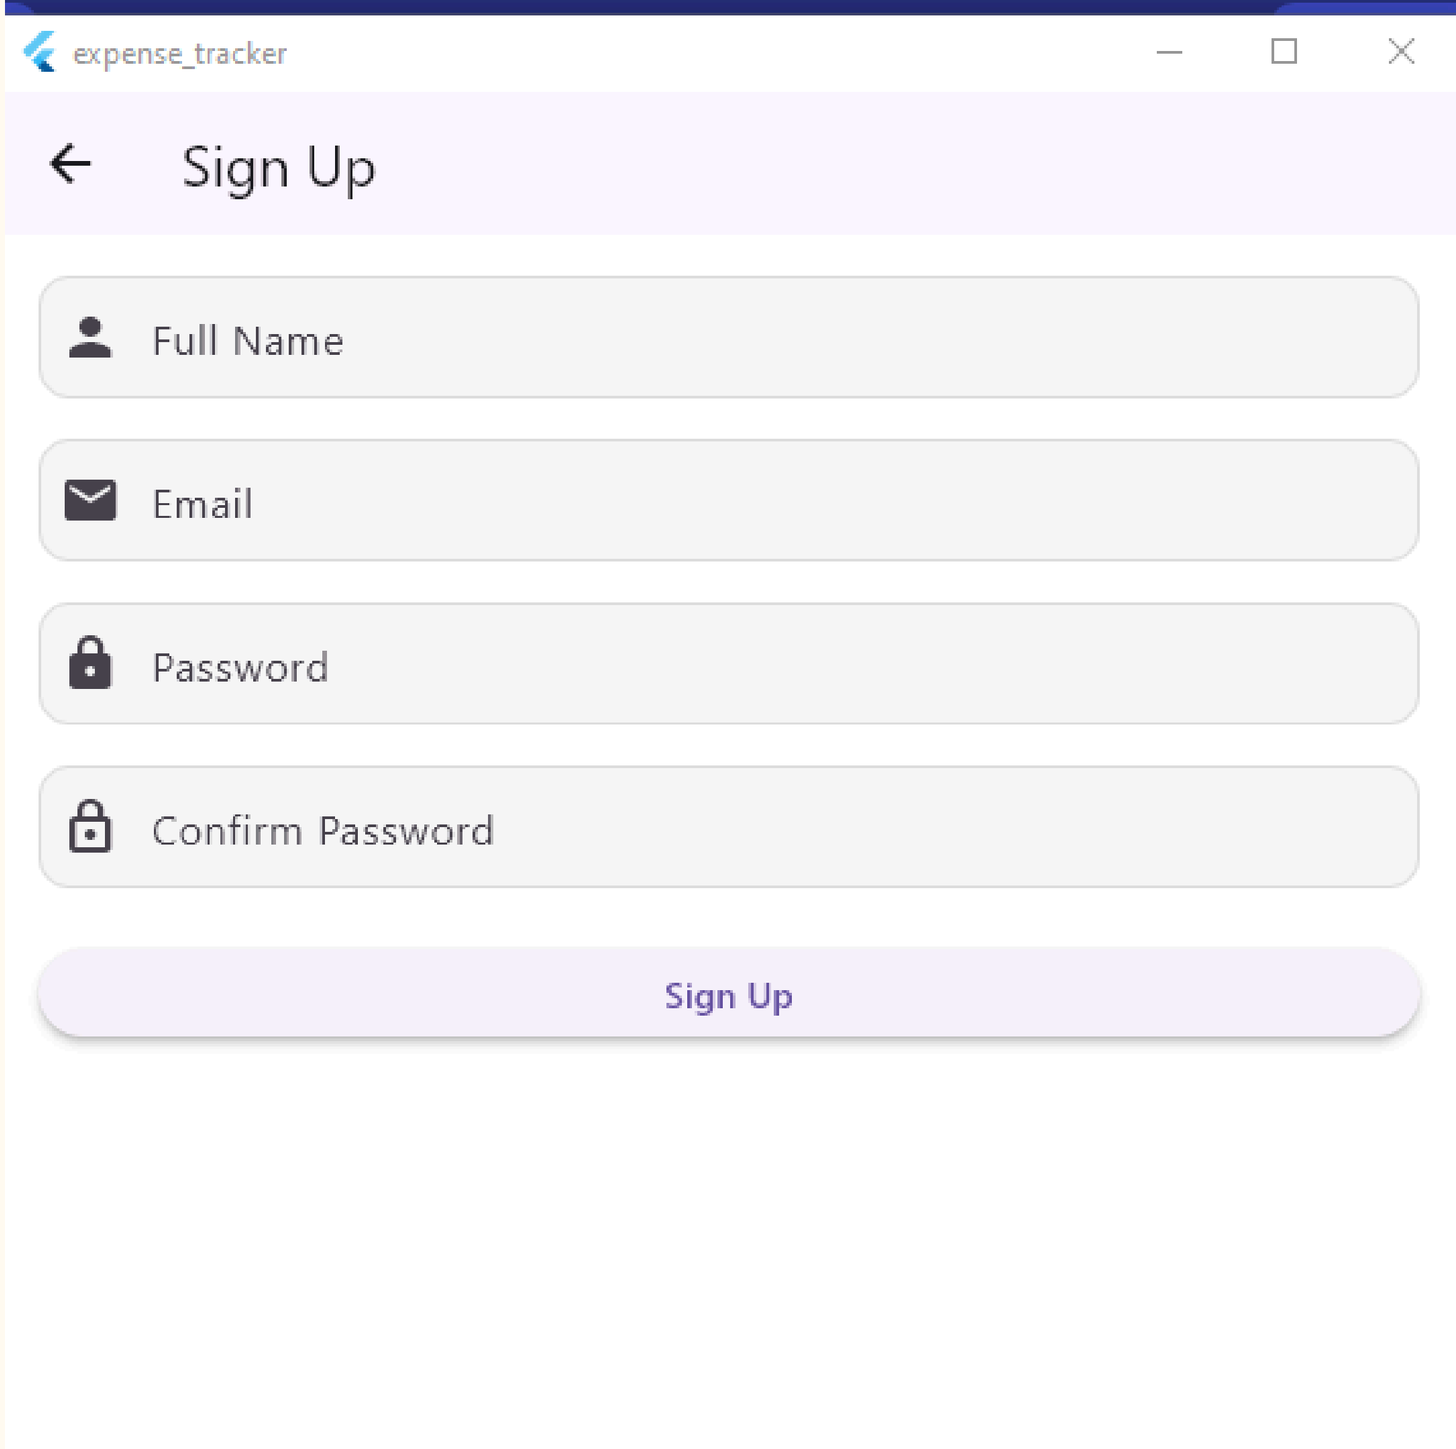
A beautiful Flutter application for managing personal expenses, tracking savings goals, and generating financial reports

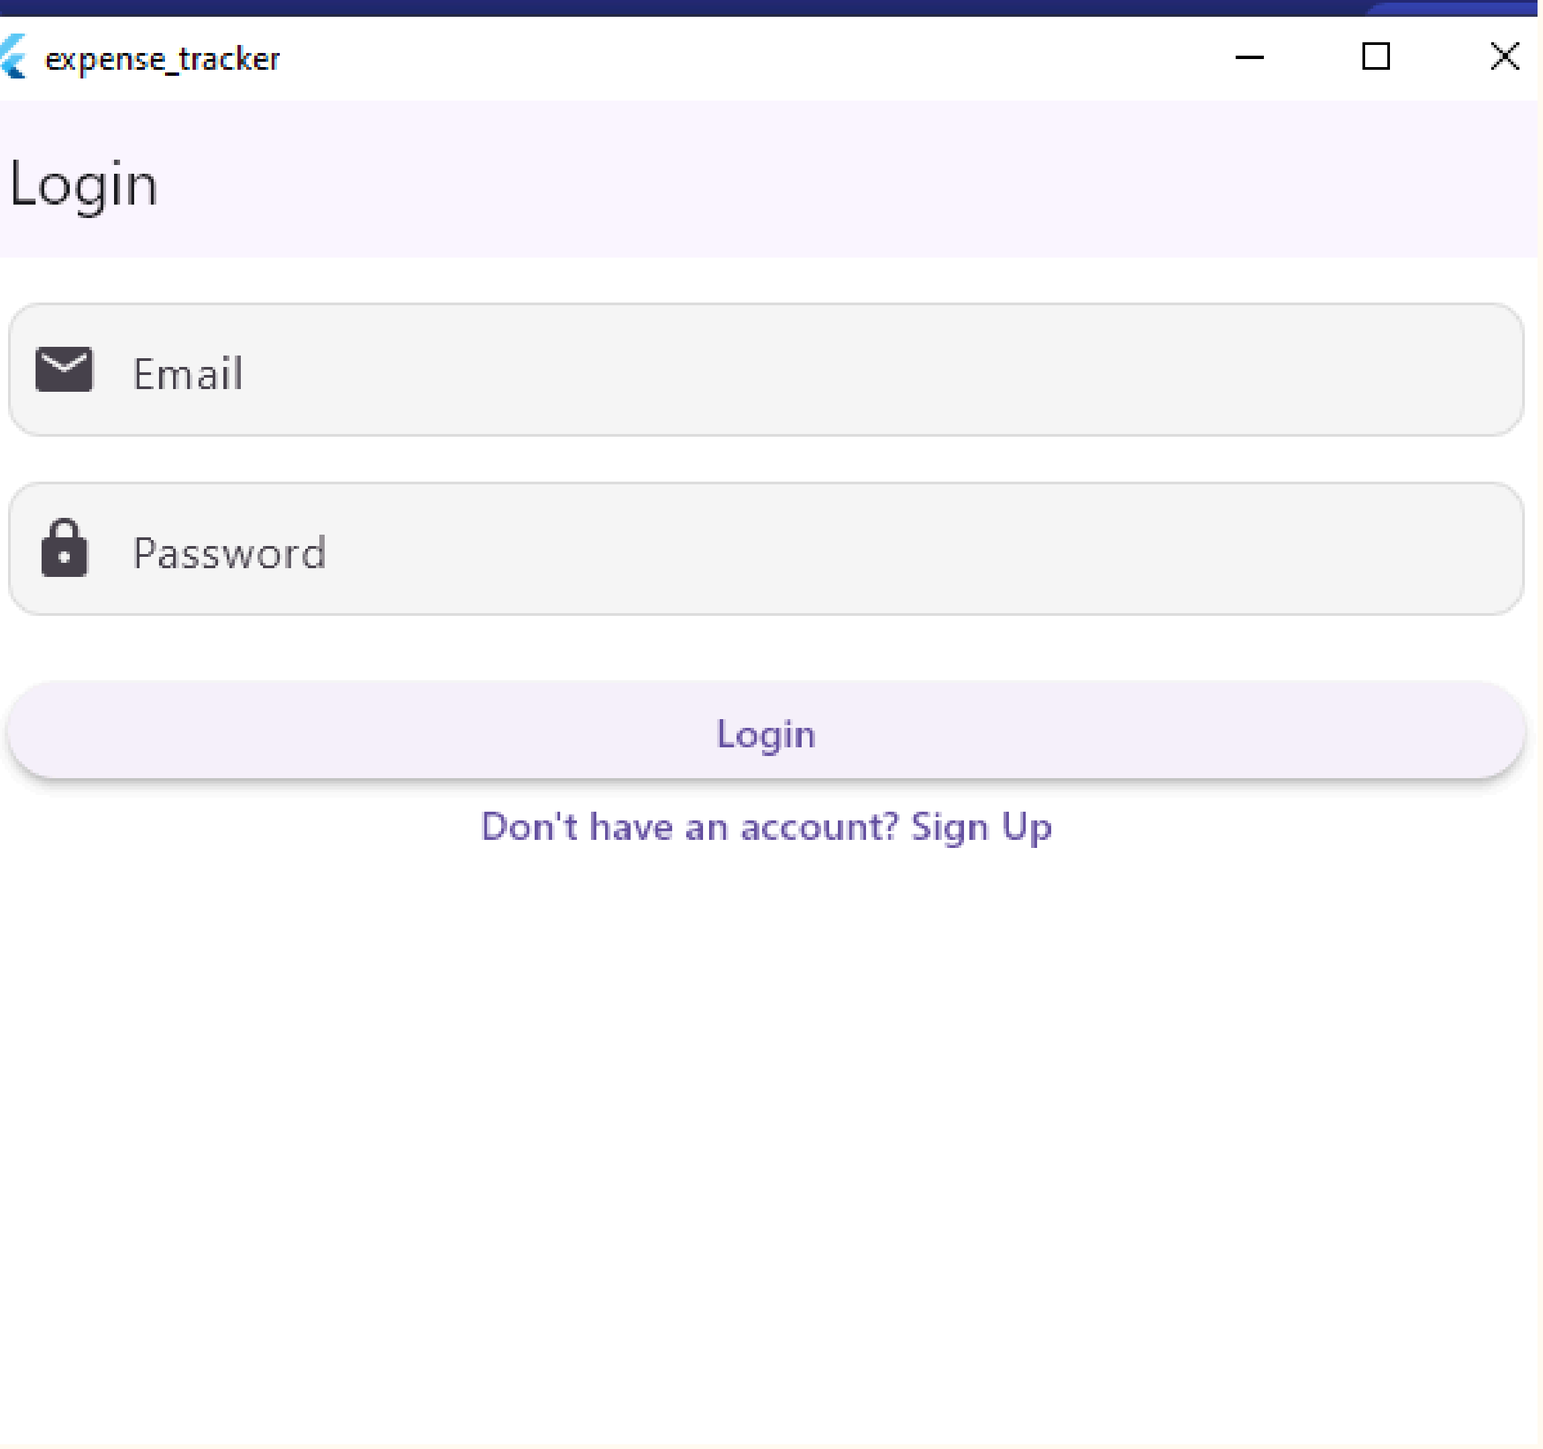
Features

- 💰 Expense Tracking
- 📊 Visual Analytics
- 🎯 Savings Goals
- 📱 User Authentication
- 📄 PDF Report Generation
- 💾 Data Persistence

sign up

I developed the application using flutter in vscode. due to some gluder issues with dependecies i run the aplication using windows or chrome . when you run the application you will see the login page. first you will create the account with signup.



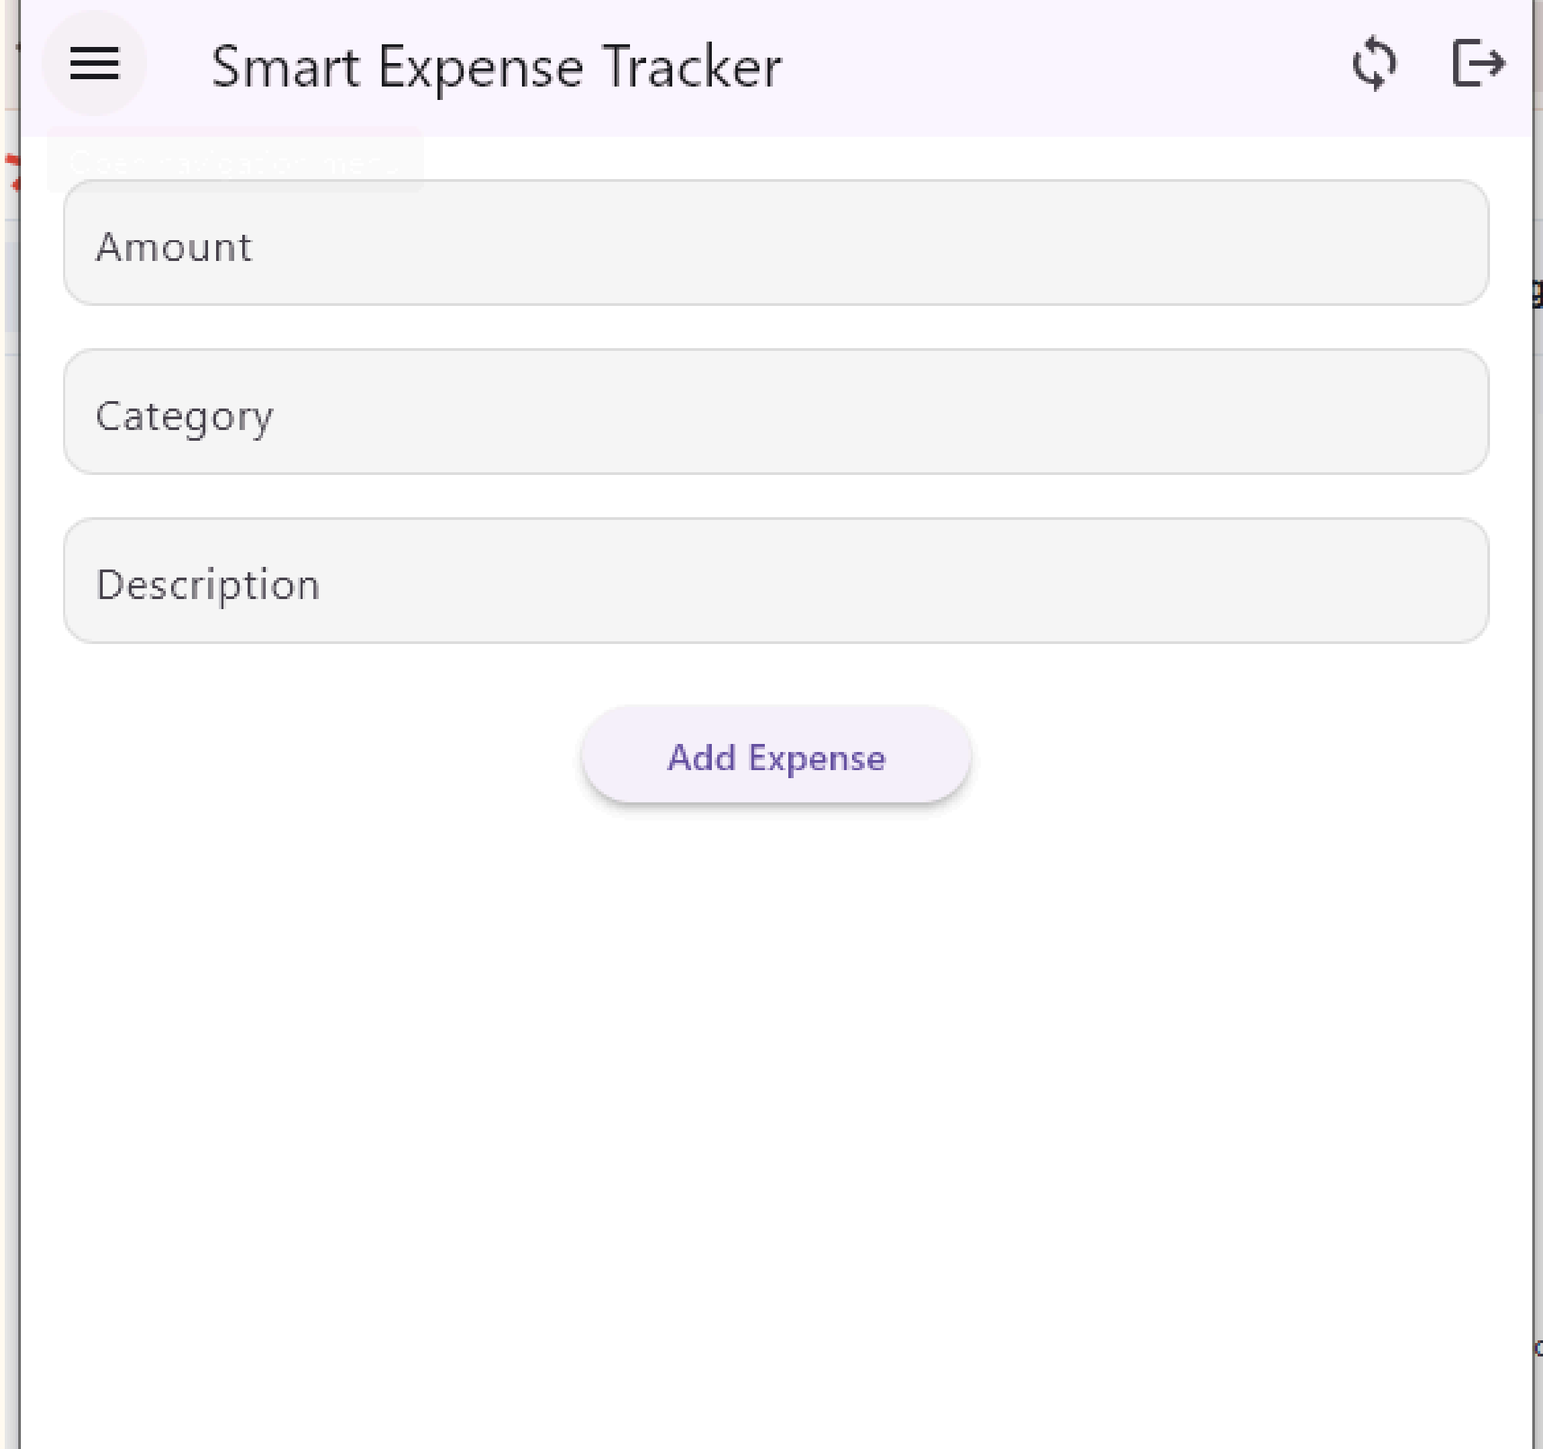


LOG IN

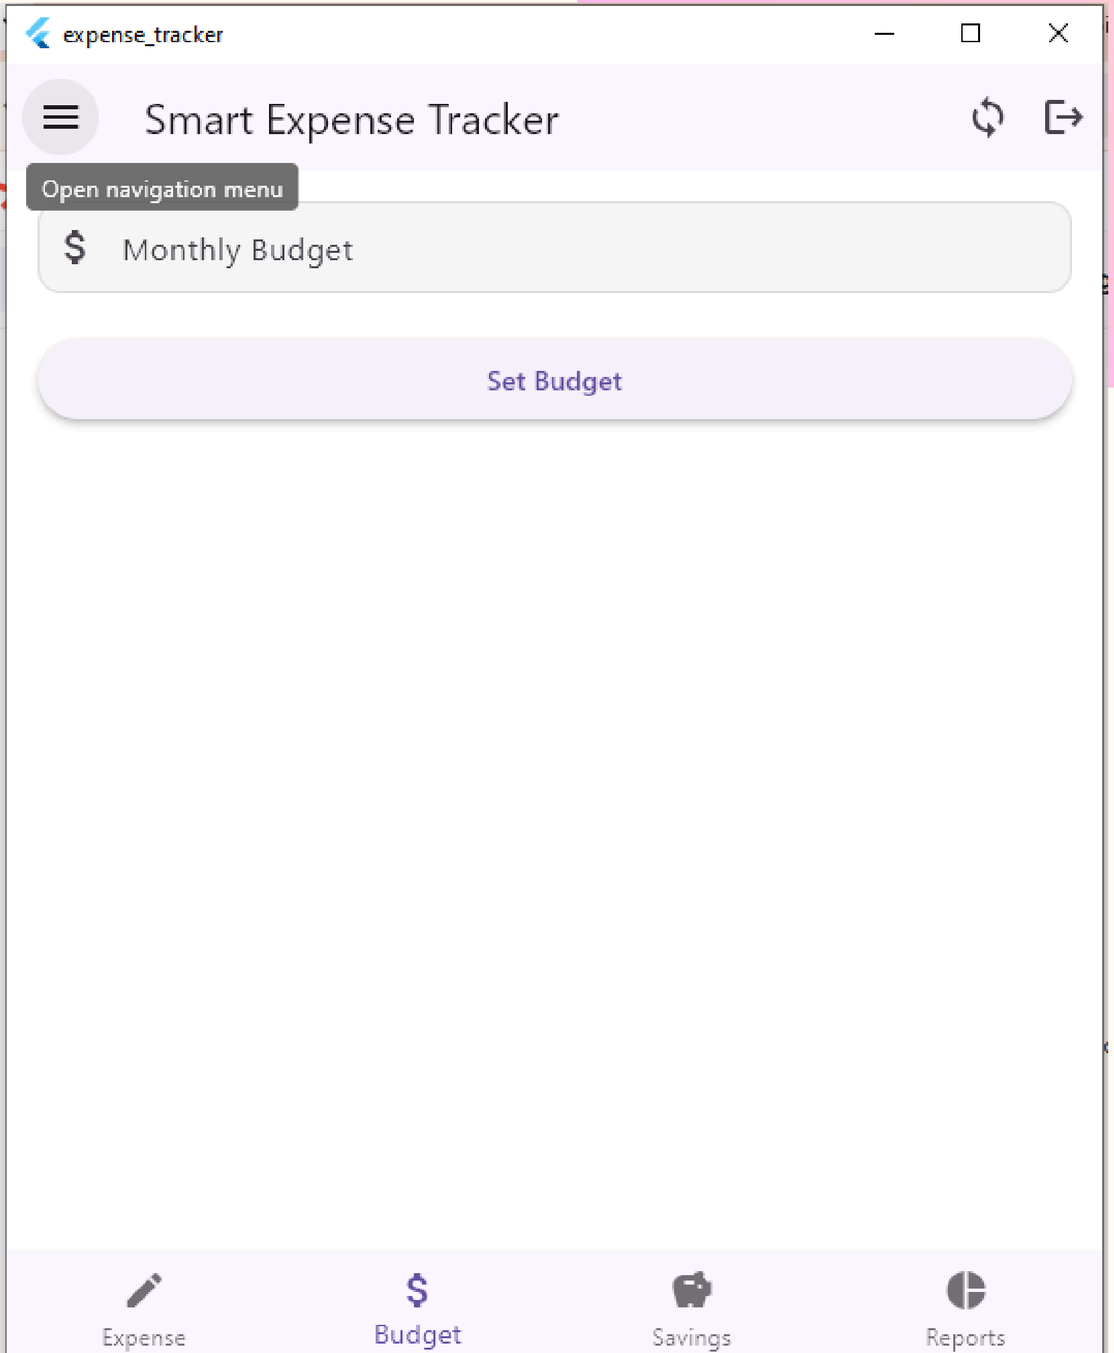
After signup you are taken to the expense tracker home page you can log out and login again

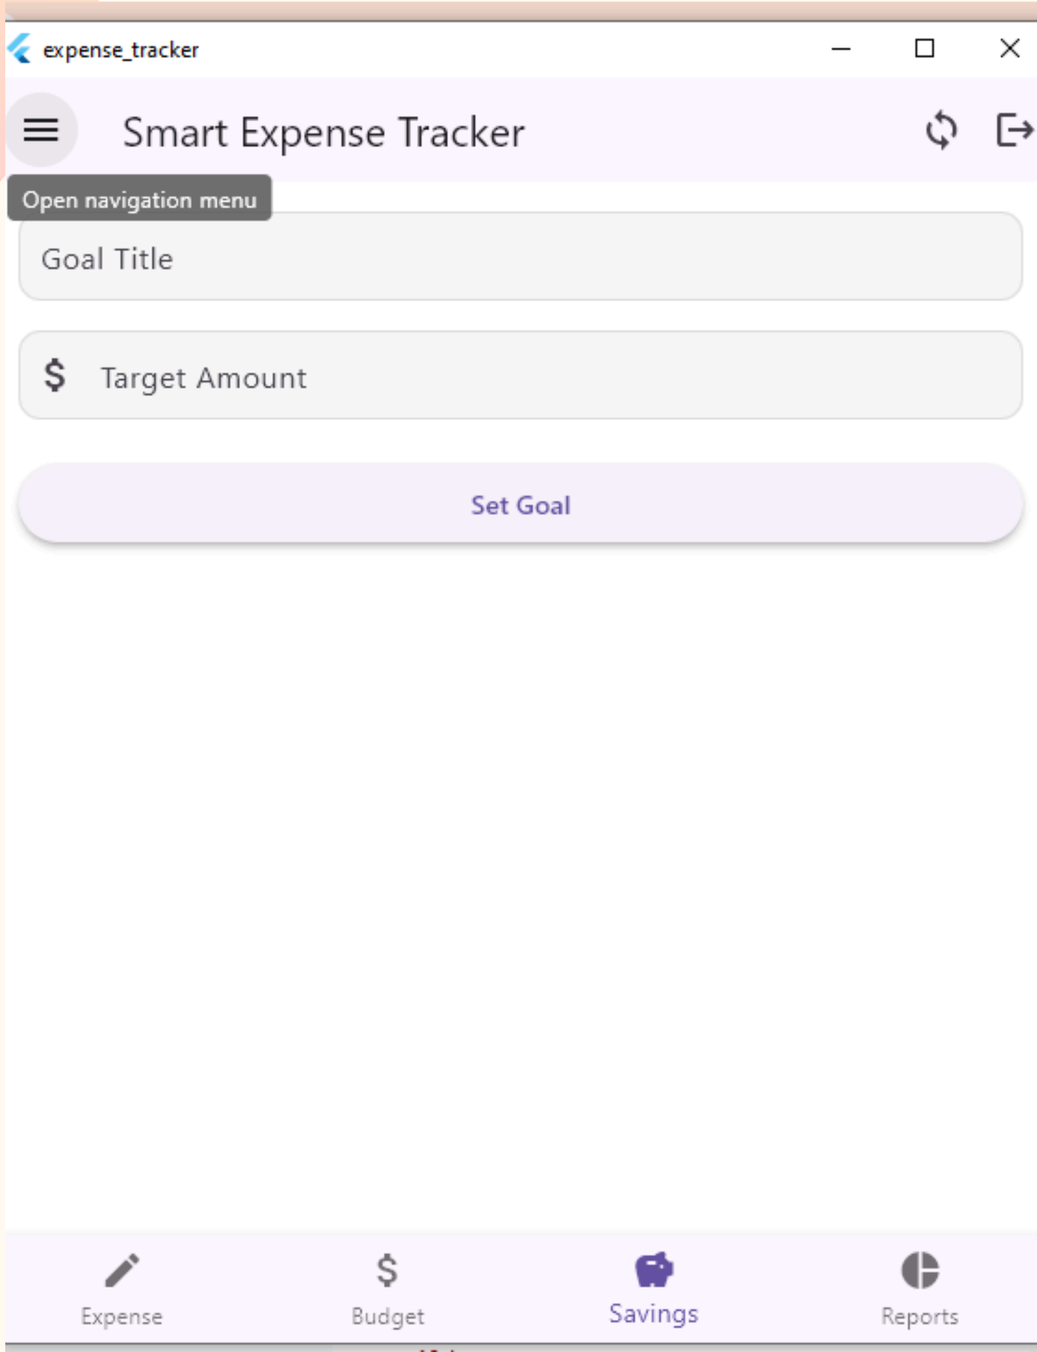
Home page

You will see the bottom navigation which has expense,goal,budget, and report.First you can record your expense or set the budget



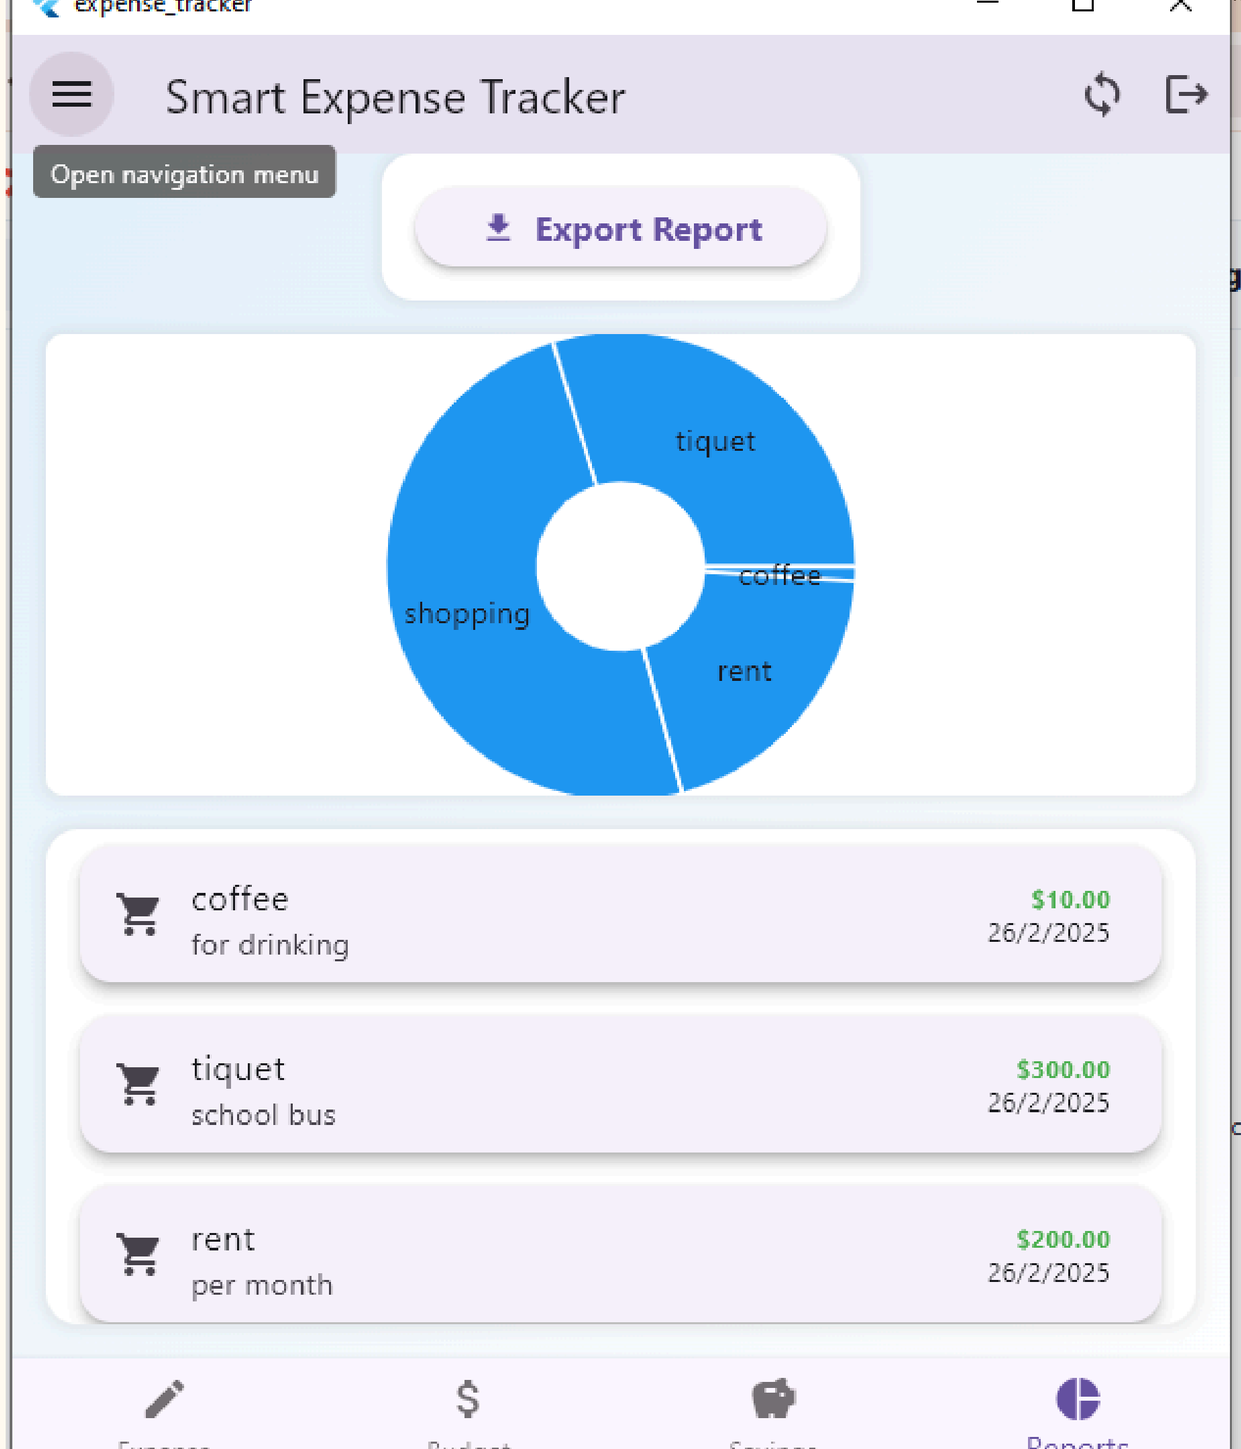
SET THE BUDGET & GOAL



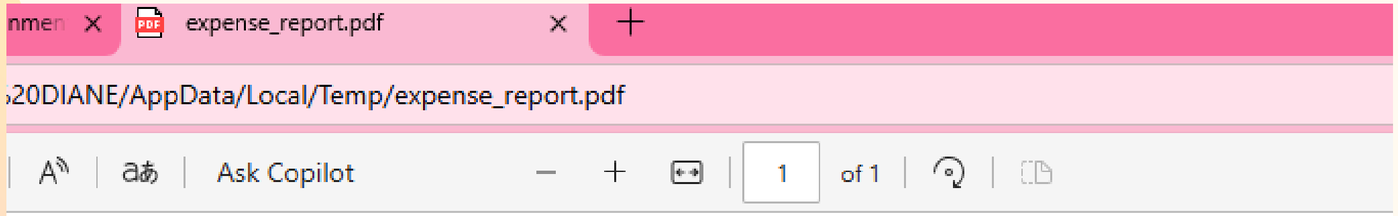


REPORT PAGE

On the report page you will view the pie chart which will show where your spending much money of the budget and you can scroll down in each container to see the expense and total expense and you can also generate the report in pdf.



REPORT GENERATED



Expense Report
